

Brema's G range of modular ice flaker heads produces granular ice flakes which automatically drop into a separate Brema storage bin.

The Brema G510A is a modular ice flaking machine that produces 510kg of granular ice per 24 hours and is designed to fit on top of a range of Brema storage bins with differing capacities from 100kg to 550kg.

Granular ice is ideal for exhibiting and presenting foods as well as for use in medical industries. The ice has a fast and efficient refrigerating effect and is easy to handle and dose.
